54/C, Convent Road, E. Palangathura, Kochchikade.

Technical Skills

- **Programming:**
  - C / C++
  - Python
  - MATLAB
  - Arduino
- **Electronics & Embedded Systems:**
  - Microcontrollers (Arduino, STM32)
  - Sensors & Actuators
  - PCB design(KiCad) & troubleshooting
- **Mechanical & Design:**
  - SolidWorks / Solid Cam
  - CNC machining
  - Mechanical assembly
- **Automation & Control:**
  - PLC basics
  - Control systems
  - Robotics fundamentals

About Me

BSc (Hons) in Science and Technology undergraduate at Uva Wellassa University of Sri Lanka, specializing in Mechatronics, with hands-on experience gained through academic projects in embedded systems, sensors and actuators, basic control systems, and mechanical design. Possesses strong problem-solving skills and a keen interest in applied engineering.

Education

Degree:- BSc (Hons) in Science and Technology
University:- Uva Wellassa University of Sri Lanka
Duration:- 2022 – present
Current GPA:- 3.5756(Up to 5 semesters)

Project Experience

Automatic Coil Winding Machine
Designed an Arduino Pro Mini–based automatic coil winding machine using two stepper motors for spindle rotation and wire traverse. Implemented a 16×2 LCD menu with five-button navigation and designed a custom PCB integrating A4988 stepper drivers.

DIY Handheld Game Console (Gameboy)
Built a portable handheld game console using Arduino Pro Mini, implementing display control and button-based user input with a focus on embedded systems and compact hardware design.

Tourism Website Development
Developed a responsive tourism website using HTML and CSS, focusing on clean UI design, structured content, and user-friendly navigation.

Cycloidal Gear Mechanism Design
Designed a cycloidal gear mechanism with hollow input and output shafts using CAD software, focusing on compact power transmission and manufacturability.

SCARA Robot Arm Implementation (Ongoing)
Currently implementing an existing SCARA robot arm involving kinematic analysis, mechanical assembly, and control system study.
